Sensiplan

Sensiplan stands for the symptothermal method of Malteser Arbeitsgruppe NFP. It is a modern, safe and natural form of family planning in which a woman can observe her physical signs of fertility that typically change in the course of the menstrual cycle. Sensiplan can be used to effectively achieve or avoid pregnancy, based on the woman's and couple's individual needs:

Goal

The trainees of this Teacher Training Course will be enabled to teach Sensiplan to interested women and couples.

Content

- Anatomy and physiology
- Fertility and the menstrual cycle
- Sensiplan in normal and special circumstances like after the use of hormonal contraceptives, during menopause and breastfeeding
- Training on the charts
- Educational and psychological aspects of teaching

Target Group

This Teacher Training Course refers to interested persons incl. doctors, midwives, nurses, social workers and others who would like to teach Sensiplan.
